EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee. The application has been amended as follows:

After the Title--

This application is a divisional of U.S. Application No. 09/917,337 filed July 27, 2001, now U.S. Patent No. 6,752,903 ~~which has been allowed.~~

Allowable Subject Matter

Claims 18 and 21-27 are allowed.

The following is an examiner's statement of reasons for allowance:

Claims 18 and 24 are allowed, because the prior art does not disclose or suggest a method for improving a wood pulping process having displacement batch digestion, wherein a pulp washing fluid is passed through filtration media to remove high molecular weight organics from the fluid, and then the treated fluid is used to displace hot black liquor.

Claims 21 and 25 are allowed, because the prior art does not disclose or suggest a method for improving a wood pulping process having pulp dilution, wherein a pulp washing fluid is passed through filtration media to remove high molecular weight organics from the fluid, and then the treated fluid is used to dilute pulp.

Art Unit: 1731

Claims 22 and 26 are allowed, because the prior art does not disclose or suggest a method for improving a wood pulping process having multi-stage fiber washing, wherein a pulp washing fluid is passed through filtration media to remove high molecular weight organics from the fluid, and then the treated fluid is used to wash fiber in a stage preceding the stage from which the washing fluid was withdrawn.

Claims 23 and 27 are allowed, because the prior art does not disclose or suggest a method for improving a wood pulping process that includes successive steps of washing/oxygen delignification/washing, wherein a pulp washing fluid is passed through filtration media to remove high molecular weight organics from the fluid, and then the treated fluid is used for washing or pulp dilution in connection with the oxygen delignification.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

Applicant's arguments filed March 26, 2007 have been fully considered and are persuasive. The rejection of claims 18 and 21-27 under 35 U.S.C. 103(a) over Fremont (US 4,226,673 and US 3,758,405) has been withdrawn. It is recognized that Fremont teaches ultrafiltration for removal of color bodies from Kraft mill effluent streams for the purpose of reducing the amount of discharged contaminants. Fremont does not suggest treating and reusing a washing fluid to improve the efficiency of particular wood pulping processes through increased concentration gradients for mass transfer, nor does Fremont suggest utilizing the reusable permeate disclosed therein in any manner as claimed.
